

STK
Interface:A
BTL5-E1.-M....-K-....

Micropulse transducer BTL

Technical Data

Output signal	analog																																			
Transducer interface	E																																			
Input interface	analog																																			
Load current max.	4...20mA or 20...4mA																																			
Load resistance	<500 Ohm																																			
System resolution	<0,2µA																																			
Hysteresis	<4µm																																			
Repeatability	resolution / min. 2µm																																			
Sampling rate	1kHz																																			
max.non-linearity	+/-100µm up to L=500mm; 0,02% FS at L>500mm																																			
Temperature coefficient Current output	[0,6µA/°C + (10ppm/°C x P x I/L)] x T2-T1																																			
Supply voltage	24V DC ±20%																																			
Current draw	<150mA																																			
Operating temperature	-40...85°C																																			
Storage temperature	-40...100°C																																			
Shock load	100g / 6ms per IEC60068-2-27 and 100g / 2ms per IEC60068-2-29																																			
Vibration	12g, 10...2000 Hz per IEC 60068-2-6																																			
Polarity reversal protected	yes																																			
Overvoltage protection	Transzorb protection diodes																																			
Dielectric constant	500 V (GND to housing)																																			
Enclosure rating per IEC 60529	IP 67 (when BKS-S32/33 is installed); IP 68, 5 bar for cable version																																			
Housing material	Stainless steel 1.4305																																			
flange- and tube material	Tube stainless 1.4571, flange 1.4571 or 1.4429 or 1.4404																																			
Mounting	flange with 6 mounting holes																																			
Pressure rating	600 bar																																			
Connection type	Cable or Connector																																			
RF emission	EN 55011 Group 1, Class A																																			
Static electricity (ESD)	IEC 61000-4-2 Severity Level 3																																			
Electromagnetic fields (RFI)	IEC 61000-4-3 Severity Level 3																																			
Fast transients (BURST)	IEC 61000-4-4 Severity Level 4																																			
Line-carried noise, induced by high-frequency fields	IEC 61000-4-6 Severity Level 3																																			
Accessories	Magnets and Connector please order separately
