

O500, O300

The new performance categories
in optical sensor technology

Top performance in two sizes.

NextGen O300/O500

The name Baumer has always stood for innovation. Our new optical sensors are part of this tradition and now available in two sizes: O500 followed by miniature O300. Both sensors provide the same performance level.

Miniaturized O300 is particularly conceived for tight spots, whereas O500 stands out in applications where extended range is required.

Maximum safety and comfort, minimum operating costs.

- Increased excess gain for reliable operation under demanding conditions
- High MTTF values
- Compared to their size, the sensors provide the largest sensing distance and range
- The most cost-efficient solution for optical sensor applications

Baumer *qTeach* – easy-to-operate, safe and wear-free

With *qTeach* we are introducing a new, convenient and wear-free teach procedure. Teaching of O500 sensors is just by a touch with any ferromagnetic tool. A blue LED light provides clear optical feedback. To prevent user errors, *qTeach* locks autonomously after 5 minutes.

Baumer *qTarget* – Time-saving installation

The Baumer design aligns the sensor's light beam to the fixing holes. This will not only compensate tolerances between individual components but ensures consistent alignment accuracy within the complete sensor series.

Baumer *OneBox Design* – high level of planning flexibility

OneBox Design stands for a new Baumer housing design. Baumer *NextGen* sensors feature the same dimensions, through holes and control elements for all sensor principles and technologies within the series.

Light sources – for every application.

Standard LED

The diffuse light spot is especially suited for object detection during parts feeding.

Baumer *PinPoint* LED

A small, homogenous light spot with a sharp focus makes *PinPoint* ideal for exact positioning and detection of small parts.

Infrared LED

Light spot is not visible to the human eye.

Diffuse sensor with background suppression

Diffuse sensor with background suppression

Diffuse sensor with background suppression

Light sensor with intensity difference

Retro-reflective sensor

Retro-reflective sensor

SmartReflect™ light barrier

NextGen sensors – giving you a competitive edge.

SmartReflect

The light barrier without a reflector.

The new shining star in sensor technology

O300 and O500 sensors are available with varied sensing principles, such as a retro-reflective or diffuse sensor with background suppression – and also with *SmartReflect* technique. Thanks to this outstanding Baumer technology, there is no more need for a reflector in object detection which will significantly cut down on costs.

- No separate receiver/reflector required
- Highly reliable object detection thanks to the barrier principle

Your benefit:

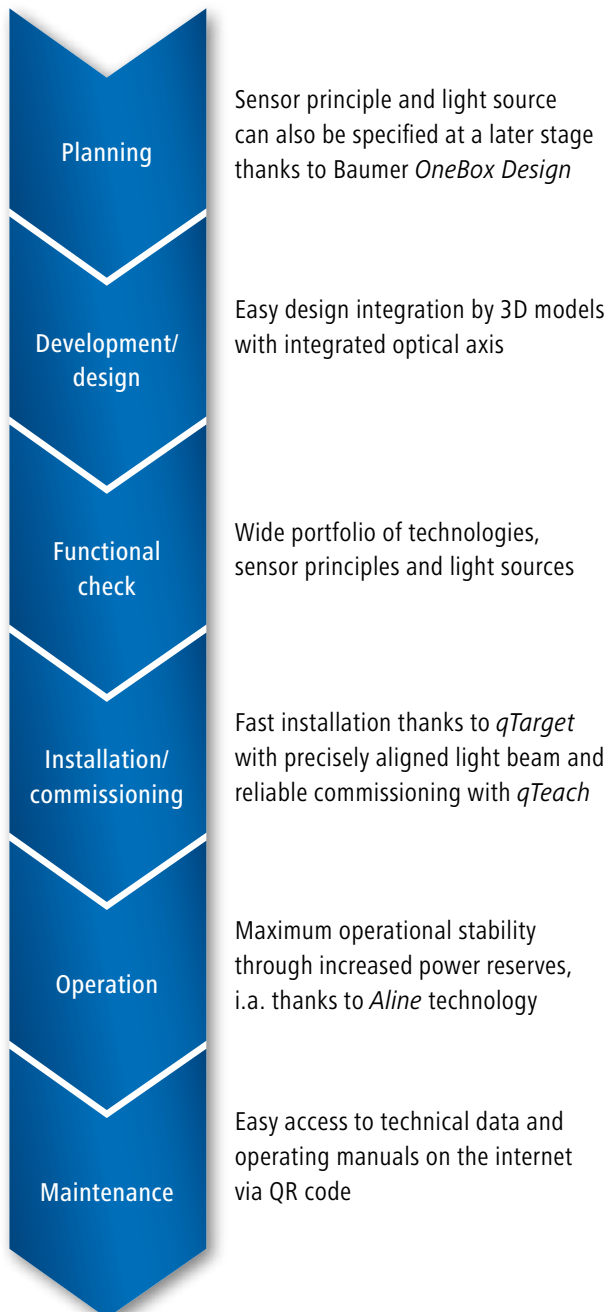

No downtimes as a result of dirty or defective reflectors.

From conception to maintenance.

Solutions for demanding applications.

Baumer takes the effective approach

Cascading*

- Prevents mutual interference of sensors positioned next to each other
- Reliable object detection in the most confined spaces

* Applies to *SmartReflect* and background suppression

Fast

- Reliability by fast response
- All technologies with a mere 0.5 ms response time

Keyhole Optic*

- Reliable detection through smallest openings: Minimum diameter 4 mm at close range
- Consistently high excess gain even at close range

* Applies to retro-reflective sensor

The new performance category – the ideal solution for many industries.

O300 und O500 stand for maximum precision, reliability and speed and set new benchmarks with respect to safety and comfort. No matter whether limited space or large ranges, thanks to identical and comprehensive versatility in two sizes, they are the ideal solution for numerous applications in different industries.

Areas of application O300:

Semiconductor industry

- Compact design for use in tight spaces
- Precise, reliable object recognition

Areas of application O500:

Packaging industry

- Convenience when changing format thanks to *qTeach*
- Reliability thanks to high reserve capacity and speed

Assembly/handling

- Accuracy thanks to speed
- Reliable recognition even with small objects

Installation and automation

- Precision and reliability
- Ideal for object recognition and positioning

Product overview

O300

| Sensor principle | Light source | Range | Output function | External teach | Connection | Order code |
|--|----------------------------|---------|-----------------|----------------|-----------------|--------------------------------------|
| Diffuse sensor with background suppression | Standard LED | 300 mm | Push-Pull | | M8, 4-pin cable | O300.GR-11110414 O300.GR-11120104 |
| Diffuse sensor with background suppression | Baumer <i>PinPoint</i> LED | 200 mm | Push-Pull | Yes | M8, 4-pin cable | O300.GP-11110415 O300.GP-11120101 |
| Light sensor with background suppression | Infrared LED | 300 mm | Push-Pull | Yes | M8, 4-pin cable | O300.GI-11121712 O300.GI-11128081 |
| Retro-reflective sensor | Standard LED | 4000 mm | Push-Pull | | M8, 4-pin cable | O300.RR-11110443 O300.RR-11120114 |
| Retro-reflective sensor | Baumer <i>PinPoint</i> LED | 5000 mm | Push-Pull | Yes | M8, 4-pin cable | O300.RP-11110449 O300.RP-11120107 |
| <i>SmartReflect</i> Light barrier | Baumer <i>PinPoint</i> LED | 300 mm | Push-Pull | Yes | M8, 4-pin cable | O300.SP-11110450 O300.SP-11120122 |
| Energetic scanner | Standard LED | 300 mm | Push-Pull | | M8, 4-pin cable | O300.ZR-11128014 O300.ZR-11128017 |

Various types also available with PNP-/NPN-outputs.
