

2/2-Way Globe Valve, Pneumatically Operated Casted Stainless Steel Body with Flanges

Continuous Globe valve

PRELIMINARY
Index 25
dd. 16.02.01

2712

DN 10 – 50

- ✓ Fully integrated in Burkert's Easy Process Control Systems
- ✓ New generation with interchangeable trims, all in stainless steel
- ✓ Integrated, cascade process controller with PID algorithm
- ✓ Automatic self-adjustment of basic parameters means autotune for the valve and for PID
- ✓ Quality certification

Picture showing a complete Burkert System using Type 2712 with TOP Control 8630

Control valve 2712 consists of a globe valve body with pneumatic piston actuator. The trim is in the form of a parabolic plug/seat system. This results in a favourable characteristic for continuous variation of the flow as a function of the parabolic plug position. Type 2712 can be actuated by the Continuous Top Control type 8630 or SIDE Control Type 1067 and 8635. TOP Control/SIDE Control thus forms an optical and functional unit with the pneumatic actuator as a complete control valve. With this control valve system, every need in the continuous control of fluids can be solved.

Process Specification

Materials		Casted Stainless Steel 316 L (conform to 1.4409)
Body		PA
Actuator		• SS/SS
Sealing		• PTFE/SS
Process media (for gases and liquids)		• Water, alcohols, oils, fuels, hydraulic liquids, salt solutions, lyes, organic solvents, steam (10 bar/+180 °C)
Viscosity		Max. 600 mm ² /s
Packing gland		PTFE V-rings (silicone grease) with spring compensation
Nominal pressure		PN 25
Temperatures		-10°C... +180°C
Fluid		-10°C... +60°C
Ambient		
Control media		Instrument air class of 3 DIN ISO 8573-1
Pilot pressure		5.5... 7 bar
Threads		G 1/4 stainless steel (SS)
Flow direction		Below seat
Interchangeable seat		Different Kvs-values per port size
Valve characteristics		See flow-rate characteristics on page 2
Control ratio		Kvs/Kvo 50:1
Seatleakage	IEC 534-4	Shut-off class IV for SS/SS Shut-off class VI for PTFE/SS
Port connections		
Flange	DIN	• DIN 2634
	ANSI	• face-to-face DIN 3202
		• ASME B16.5 RF ¹⁾ Class 150
		• face-to-face DIN/ISA S75.03, EN 558-2
	JIS	• JIS 10K RF ¹⁾ ; JIS B2238
		• face-to-face JIS B2002 serie 20 (ANSI B16.10)

¹⁾ Raised face (RF)

Applications: Food & Beverage

- CIP / SIP; Steam
- Auxiliary Processes

Water Treatment

- Air Control
- Chemical Dosing

Cosmetics

- CIP / SIP; Steam

Textile

- Steam; Water; Air; Dyeing

Port size (tube) [mm]	Orifice DN (seat) [mm]			Actuator size [mm]	Kvs-value water [m ³ /h]			Weight with controller 8630 [kg]

2/2-Way Globe Valve, Pneumatically Operated Casted Stainless Steel Body with Flanges

Flow curve and description

Remarks on the flow characteristic

- Equipercentile parabolic plug; linear plug can also be supplied
- Flow characteristic runs within DIN/IEC 534-2-4
- Theoretical control ratio $K_{vs}/K_{vo} = 50 : 1$ other control ratios can also be realized
- K_{vR} value at 10% of stroke for $DN \leq 10$ mm
 K_{vR} value at 5% of stroke for $DN > 10$ mm
 (K_{vR} value = smallest K_v value at which the gradient tolerance to DIN/IEC 534-2-4 is still complied with)

Kv values [m3/h]

Further Process Connections are:

* e.g. one side with flange, other side Tri-Clamp®

2/2-Way Globe Valve, Pneumatically Operated Casted Stainless Steel Body with Flanges

Valve Actuation System: TOP Control

Type: 8630

TopControl Continuous type 8630 forms an optical and functional unit with the pneumatic actuator. Main functional groups of the TopControl Continuous are:

- Position Control/Positioner and Process Control/Process Controller in one device, integrated PID
- The distance measuring system for continuous reporting of the actual position of the pneumatic actuator and the valve
- The microprocessor controlled electronics for signal processing, setpoint/process value comparison
- The pneumatic positioning system for single and double-acting actuators whose rocker solenoid valves of Type 6510 are driven by pulse-width modulated voltage

The TOP Control Continuous can be used in a variety of different applications in fluid control solutions.

→ see data sheet Top Control type 8630

Continuous Globe valve

Valve Actuation System: SIDE Control 3-wire

Type: 1067

SIDEControl type 1067 is a 3-wire Positioner composed of the main functional groups position measuring system, electropneumatic actuator system and microprocessor electronics.

Main functional groups of the Side Control Continuous are:

- The position measuring system continuously measures the current distance moved by the actuator (actual value)
- Comparison and evaluation of the actual value and the setpoint-/process value are performed by the electronics
- The control difference is corrected by the electropneumatic actuator system
- Position Control/Positioner and Process Control/Process Controller in one device, resulting in a high performance cascade control system for process variables

→ see data sheet SIDE Control type 1067

Valve Actuation System: SIDE Control 2-wire

Type: 8635

SideControl S type 8635S is a 2-wire electropneumatic positioner for pneumatically operated process valves. The input signal of 4 - 20 mA serves to transmit the set point signal and to supply the device with power at the same time.

As an alternative, communication can be effected via the HART protocol.

- The HART protocol is modulated onto the current signal using the FSK procedure (Frequency Shift Keying)
- Signal processing, control and drive of the internal positioning system are carried out by microprocessor controlled electronics
- The software function Autotune implemented enables automatic adaptation of the positioner to the control valve used
- Parametrization and operation are performed comfortably via three keys and a display with plain text, or via the HART protocol (optional)
- To build up a decentralized control system, SIDE Control is equipped with a process controller with PID behaviour. In this case, a process control loop is superimposed on the positioning loop in a cascade structure
- The compact, robust design, the housing is suitable for use in chemical and process engineering

→ see data sheet SIDE Control type 8635

2/2-Way Globe Valve, Pneumatically Operated Casted Stainless Steel Body with Flanges

Globe Valve Systems

A continuous globe valve system consists of a continuous globe valve type 2712 and a valve actuation system TOP Control type 8630 or SIDE Control type 1067 or 8635.

Burkert offers a wide range of valve actuation systems suitable for the new continuous globe valve.
