

2/2-Way; G 1/2"-1"; PN 10 bar

### Advantages/Benefits

- ▶ Waterhammer-free
- ▶ Low noise
- ▶ Zero differential pressure
- ▶ Compact design with high flow rates
- ▶ Low maintenance
- ▶ Coil can be locked in 4 x 90° positions, or moved freely between, as required
- ▶ Modular solenoid coil system, different sizes and power ratings
- ▶ Easy coil change
- ▶ Wide range of cable plug options Type 2508

### Design/Function

The valves are based on a modular concept comprising three basic elements; Valve assembly, push-over coil and standard cable plug. The servo-system with coupled diaphragm/armature assembly and armature guide tube is mounted on the valve body.

The coil is pushed over the armature guide tube and thus isolated from the medium. The medium is only in contact with the valve internals and body.

All valves operate from zero pressure.

A wide selection of pipe and orifice sizes is offered. Valves are available with threaded ports in brass or stainless steel.

To simplify ordering, a wide selection of standard combinations of valve body, push over coil and standard cable plug can be ordered with one item number.

Cable plug options of Type 2508 are available to suit special electrical application requirements.

- The modular concept provides flexibility to meet application requirements.
